## great imitators

The Great Imitator (also The Great Masquerader) is a phrase used for medical conditions that feature nonspecific symptoms and may **be** confused with a number of other diseases. Most great imitators are systemic in nature. Diseases sometimes referred to with this **name** include:

- Various cancers
- Various rheumatic conditions, including:
  - Fibromyalgia
  - Psoriatic arthritis
  - Lupus erythematosus
  - Systemic lupus erythematosus
- Sarcoidosis
- Multiple sclerosis
- Celiac disease
- Addison's Disease
- Pulmonary embolism
- Various infectious diseases, including:
  - Syphilis
  - Lyme disease
  - Nocardiosis
  - Tuberculosis
  - Brucellosis
  - Malaria
